DETAILED ACTION

Amendment received on 3/21/2005 is acknowledged and entered. Claims 1, 8 and 16 have been amended. Claims 1, 3-8, 10-16 and 18-21 are currently pending in the application.

Claim Rejections - 35 USC § 112

Claim Rejections under 35 USC § 112 have been withdrawn due to the applicant's amendment.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 5-7, 8, 12-15, 16 and 20-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over the "SBC global network DSL: Customer Self Install" (Document) in view of Klees (US 5,283,661).

The Document, which appears to be published on August, 2000, teaches customer self installation DSL kit and method of installing thereof, comprising:

Independent Claims.

As per claim 1,

- a digital subscriber line modem (page 4; last §);
- at least one digital subscriber line filter (page 1; 3rd §);
- a computer-readable medium containing a computer-readable software code (page 9; 2nd §).

Application/Control Number: 09/847,045

Art Unit: 3639

Furthermore, Document teaches a consumer computer manufacturer's Owner's Guide and computer's Operating System on installation media (CD or diskettes) (page 9; 2nd §).

However, Document does not specifically teach that said instruction manual (Owner's Guide) is included in the kit.

Klees teaches an apparatus for assisting in the installation of a facsimile machine, wherein the indication is provided that currently, most facsimile equipment come with a manual that has instructions for installation and setup of the machine (C. 1, L. 14-15).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Document to include that said instruction manual is included in the kit, as disclosed in Klees, because it would advantageously allow to provide the customer with necessary diagram and descriptions of the successive installation steps, thereby simplify the installation process for the customer.

Furthermore, Document teaches:

As per claim 8,

- a network card (page 4; last §);
- a digital subscriber line modem (page 4; last §);
- at least one digital subscriber line filter (page 1; 3rd §);
- a computer-readable medium containing a computer-readable connection software code (page 9; 2nd §).

Furthermore, Document teaches a consumer computer manufacturer's Owner's Guide and computer's Operating System on installation media (CD or diskettes) (page 9; 2nd §).

However, Document does not specifically teach that said instruction manual (Owner's Guide) is included in the kit.

Klees teaches an apparatus for assisting in the installation of a facsimile machine, wherein the indication is provided that currently, most facsimile equipment come with a manual that has instructions for installation and setup of the machine (C. 1, L. 14-15).

Application/Control Number: 09/847,045

Art Unit: 3639

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Document to include that said instruction manual is included in the kit, as disclosed in Klees, because it would advantageously allow to provide the customer with necessary diagram and descriptions of the successive installation steps, thereby simplify the installation process for the customer.

As per claim 16, Document teaches:

- a network card
- a digital subscriber line modem (page 4; last §);
- at least one digital subscriber line filter (page 1; 3rd §);
- a computer-readable medium containing a computer-readable connection software code (page 9; 2nd §).

Furthermore, Document teaches a consumer computer manufacturer's Owner's Guide and computer's Operating System on installation media (CD or diskettes) (page 9; 2nd §); and instruction regarding internet service provider software (page 3, 2nd and 3rd §§).

However, Document does not specifically teach that said instruction manual (Owner's Guide) is included in the kit.

Klees teaches an apparatus for assisting in the installation of a facsimile machine, wherein the indication is provided that currently, most facsimile equipment come with a manual that has instructions for installation and setup of the machine (C. 1, L. 14-15).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Document to include that said instruction manual is included in the kit, as disclosed in Klees, because it would advantageously allow to provide the customer with necessary diagram and descriptions of the successive installation steps, thereby simplify the installation process for the customer.

Dependent Claims.

As per **claims 5 and 13**, said kit, wherein the instruction manual provides a point of contact telephone number associated with said kid; said kid including the digital subscriber line modem (page 3, 6th §; page 5, 6th §; page 4; last §).

Art Unit: 3639

As per **claims 6 and 14**, said kit, wherein the instruction manual provides a point of contact telephone number associated with said kid; said kid including the digital line filter (page 3, 6th §; page 5, 6th §; page 1, 3rd §).

As per claims 7, 15 and 20, said kit, wherein the instruction manual provides a point of contact telephone number associated with said kid; said kid including the description of computer-readable connection software code (page 9; 2nd §).

As per claims 21, said kit including an instruction manual (See reasoning applied to claim 1).

Dependent claims 3-4, 10-11 and 18-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over the Document in view of Klees and further in view of Official Notice.

As per claims 3-4, 10-11 and 18-19, Document in view of Klees teach all the limitations of claims 3-4, 10-11 and 18-19, except a container, which contains said kit and manual.

Official notice is taken that it is well known to provide goods ordered by customers in shipping containers.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the Document to include that said contents of the kit are sent to the customer in a container, because it would advantageously protect the contents of the kit from being damaged or lost during shipment.

Response to Arguments.

Applicant's arguments filed 3/21/2005 have been fully considered but they are not persuasive.

In response to the applicant's argument that the prior art fails to disclose the claimed unified installation process, it is noted that the claimed invention is directed to the apparatus. Specifically, the independent Claims 1, 8 and 16 refer to a digital subscriber line self installation kit.

In response to the applicant's argument that the prior art fails to disclose at most one instruction manual, it is noted that Klees was applied for this feature. Specifically, Klees teaches an apparatus for assisting in the installation of a facsimile machine, wherein a manual that has instructions for installation and setup of the machine is provided (C. 1, L. 14-15). The motivation to combine the references would be to advantageously simplify the installation process for the customer by providing necessary diagram and descriptions of the successive installation steps.

In response to the applicant's argument that the prior art fails to disclose a container, which contains the contents of the kit, the examiner maintains that it is well known to provide goods ordered by customers in shipping containers. The motivation to use the container would be to advantageously protect the contents of the kit from being damaged or lost during shipment.

Art Unit: 3639

Conclusion

Any inquiry concerning this communication should be directed to Igor Borissov at telephone number (571) 272-6801.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's Supervisor, John Hayes, can be reached at (571) 272-6708.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington D.C. 20231

or faxed to:

571-273-8300
